BASO PRISM 500

SONATECH
Akustik + Schallschutz

PRODUCT DESCRIPTION

Baso Prism 500 is an extremely light absorber element made of flexible, open-cell foam. Baso Prism 500 can therefore be used as a creative element in the room.

Baso Prism 500 is a high-quality absorber element (= edge absorber) for optimising room acoustics. Room acoustics can be optimised in a very specific way due to the absorber`s low weight and the variable way in which it can be positioned. Any resonances in the room can be effectively reduced.

POSSIBLE APPLICATIONS

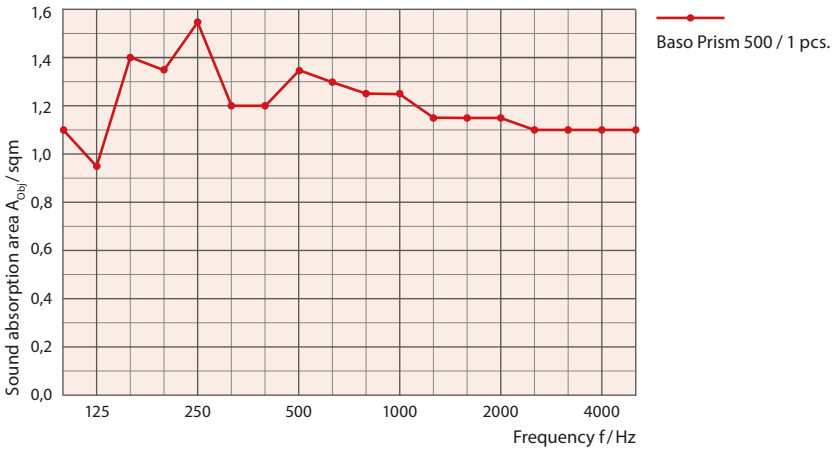

- Control rooms in sound studios
- Music rooms for the high-end area
- Rooms with strong resonances

CHARACTERISTICS

- **Colour:** light grey and white
- Filigree, open-cell structure
- Excellent sound absorption capacity over an extremely wide frequency range
- **UV resistant**
- **DIN 4102 B1 (high flame resistance)**

SOUND ABSORPTION DIN EN ISO 354

Sound absorption according to ISO 354:

TECHNICAL DATA

Weight	approx. 1.1 kg / element
Burn behaviour	DIN 4102 B1
Temperature range	-40 °C – +150 °C
