

SKYLINE DESIGN ACOUSTIC COLUMN NATUR

PRODUCT DESCRIPTION

The natural edge absorber SkyLine NATUR is placed in the corners of a room and fits into the room's appearance. In particular, low frequency sound components are absorbed and there is no more annoying "drone" in the room.

MAIN AREAS OF APPLICATION

- Small and medium-sized rooms, conference and meeting rooms, think tanks, presentation rooms
- Rooms in which it is not possible to use the wall or ceiling surfaces to improve the acoustics (glass partitions)
- Rooms with an existing acoustic ceiling in which the aim is to add more balanced acoustics in the low frequency range

POSSIBLE APPLICATIONS

- Office / in the home
- Recording studio
- Hotel

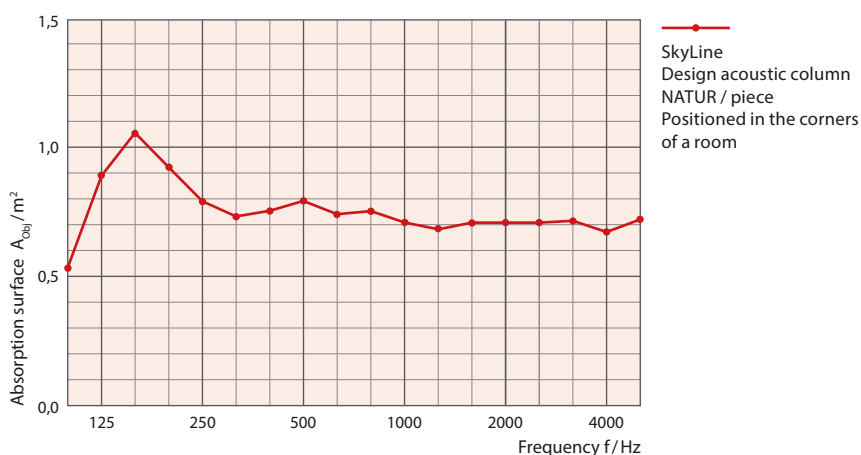

CHARACTERISTICS

- **Size:** 1000 x 355 x 355 mm
- **Colours:** 9 basic colours
- **Fabric:** new wool
- **Top panel:** oiled beech
- **Material:** spruce and pine wood from the Black Forest – produced in sustainably managed forests
- **Renewable raw materials**

SOUND ABSORPTION DIN EN ISO 354

Laboratory measurement according to ISO 354:
